

Avesta OriginalFinish™ – Grease Remover

Grease can be tough to remove from any surface, including stainless steel, but Avesta's OriginalFinish™ Grease Remover was developed specifically to cut through grease, returning your steel to its original lustrous look, feel and finish.

OriginalFinish™ Grease Remover is suitable for a variety of applications, including kitchens, cladding, clean rooms and appliances.

Regular cleaning with OriginalFinish™ Grease Remover promotes rapid regeneration of the chromium oxide layer that protects the surface. Plus, with a pH of 12, this alkaline formulation is able to assist in the removal of bacteria and germs.

OriginalFinish™ is the only stainless steel cleaner on the market that is made by a stainless steel manufacturer. It was developed at the request of our customers, because they could not find a cleaning product that could maintain the original luster of their original stainless steel products. Our name says it all: OriginalFinish™ helps you to preserve the original look, the original feel and the original finish of your stainless steel.

Use Avesta OriginalFinish™ Grease Remover to clean:

- Cooking oils, grill oil residue
- Lubricating oil, grease deposits
- Coffee, tea or soda stains
- Bacteria and germs
- Road grime
- Cigarette burns
- Ink marks
- PVC coating residue (from the protective plastic film on stainless steel)*
- Paint*
- Rubber marks*
- Labels or glue*
- Residue from oil-based cleaners

For surface rust removal, use Avesta OriginalFinish™ Rust Remover

For fingerprint removal, use Avesta OriginalFinish™ Fingerprint Remover

*) In some cases a solvent may have to be used

NSF Reg. No. 136047
